

ABSTRACT

Disclosed is a composition containing a compound represented by formula (1) below, and a particular class ingredient. In formula (1), R^1 represents $-CH_2OH$ or $COOR^6$, R^6 represents hydrogen, lower alkyl group having the number of carbon atoms of 1 to 3 or cation capable of forming a salt with COO^- , each of R^2 to R^5 independently represents a hydrogen atom or methyl group, and \cdots A \cdots represents $=C(CH_3)-$, $-C(CH_3)=$, $-C(=CH_2)-$, $-CH(CH_3)-$, or $-C(OH)(CH_3)-$.
